DETAILED ACTION

1. This action is responsive to communications: original application filed 05/11/2000, with acknowledgement of foreign priority date of 1/12/2001.
2. Claims 1-93 are currently pending in this application. Claims 1, 10, 21, 25, 29, 33, 37, 44, 51, 52, 61, 64, 71, 72, 75, 76, 79, and 80 are independent claims.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-50 and 83-93 are drawn to a biometric authentication token mechanism used with an unlocking/locking mechanism, classified in class 713 subclass 186 and class 340 subclass 5.52.
 - II. Claims 51-60 are drawn to biometric authentication token mechanism utilized for opening a gate classified in class 340 subclass 825.
 - III. Claims 61-70 are drawn to biometric authentication token mechanism utilized with an ATM machine, classified in class 225 subclass 379.
 - IV. Claims 71-82 are drawn to biometric authentication token mechanism utilized while using a portable terminal system, classified in class 713 subclass 200.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I through IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (I) has separate

mechanism utilizing biometrics utilized with an unlocking/locking mechanism, invention (II) has separate utility such as an authentication mechanism utilized to open a gate, invention (III) has separate utility such as an authentication mechanism utilized with an ATM machine, invention (IV) has separate utility such as an authentication mechanism utilized with a portable terminal to access a network (See MPEP § 806.05(d)).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III is not required for Group IV; restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the -fee required under 37 CFR 1.17(i).

9. On 2 December 2004, examiner contacted attorney of record Eric Hyman at (310) 207-3800, who indicated a decision as to which group to elect could not be made at this time.
